DIALKYL PEROXIDES

DECISION ON PETITION

This is a decision on the petition under 37 CFR §1.102(c) , filed June 19, 1998, to have the instant application made special.

Applicant alleges that the instant invention affords an "efficient low cost method of production for di-t-butyl peroxide (DtBP), for use as an ultra high cetane blending oxygenate for creating clean burning diesel fuel." Applicant offers additional argument in support of the environmental advantages of the instant invention. Such advantages clearly meet the criteria of 37 CFR §1.102(c).

The petition to make special is **GRANTED**.
